Overall purpose of the conference

- To improve access to TB medicines and pharmaceutical services by learning from our successes and failures and sharing knowledge and resources
Specific objectives

• Decrease gaps in technical knowledge between participants about
  – Early warning systems
  – Data collection
  – Monitoring of medicine use and risk management
  – Case finding
  – Finance

• Country representatives have identified ways to build on success and to avoid missteps experienced in other countries

• Each country team has a series of actionable ideas to improve their practice back home with some immediate steps for action

• Participants know where to go for support

• Partner organizations have identified ways to build on and complement activities related to the themes in their countries
